

# TECHNICAL PLASTIC PROFILES

Technoform Group and its subsidiaries are among the globally leading providers of technical plastic profiles with industry focus on the construction, automotive, aviation and engineering industries.

The name of Technoform represents extraordinary customer service, state-of-the-art technology and development competence. To best meet customer requests, we offer not only standard products, but also highly precise technical profiles produced in a procedure we have specifically developed for this. Extensive geometries, high precision and surface quality, as well as processing of technical and fibreglass-reinforced plastics are our specialties.

# PROFIT FROM OUR COMPETENCES

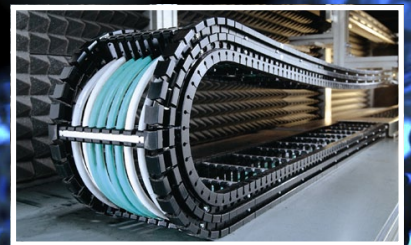

- **Sample profiles within 14 days** shorten your development cycles.
- **Serial quality prototypes** provide security for serial production.
- **Highly polished surfaces** enable unique looks and best sliding characteristics.
- **Tolerances in the area of 100th millimetre** and
- **uniquely sharp contours** ensure precise fit and function.
- **Internal-calibrated hollow chambers** permit optimisation of sliding properties of interlocking components.
- **Extrusion of die-cast material** enables 100% integration in surrounding die-casting components.
- **Electrical conductivity** by inline-extruded metal inserts.
- **Global presence** – we produce where you are.

# LOOKING BEYOND THE RIM OF YOUR TEACUP

Use our experience from diverse challenges of different industries:

CONSTRUCTION	AVIATION	AUTOMOTIVE	INDUSTRY
